To Whom It may concern:

I'm writing to address a matter of great concern not only to myself, but also an issue of incredible importance to the larger community. The creation + implementation of an innovative energy plan for New York State in the face of the ever-mounting energy + climate change crisis deserves praise + support. However I feel it is extremely important to be specific in defining the aims of such an energy plan as proposed by Executive Order No. 2. It is crucial that clear emphasis^{on} and commitment to investing in renewable energy technologies such as Solar + Wind energy instead of unsustainable coal + expensive nuclear energies. In addition to the obvious environmental benefits of non-polluting renewable energy, the opportunities for job growth within an emerging field are especially valuable for NY residents given the current economic situation.

Therefore I'm writing to whole-heartedly express my support for a NYS energy plan focusing on non-polluting sources, stabilization of fuel costs + a general improvement of the quality of life for all New Yorkers. A written response from you + your office acknowledging your position on this matter would be greatly appreciated.

Sincerely,
Justin M. Meccio
