

Maura Gregory

On April 9, 2008, Gov. Paterson issued Exec. Ord. No. 2, to create and implement a state energy plan to guide NY's energy choices for the next 10 years. I am writing to inform you that I support significant state investment in alternative energy sources such as wind, solar, geothermal, hydro, and biomass energy sources. This will stabilize our energy costs, create new local jobs, and increase energy independence. I strongly urge you to oppose any further creation of or investment in coal or nuclear energy, as coal cannot be made "clean", and nuclear technology is far too dangerous and expensive. Please inform me in writing of your position.
