

# State Energy Plan 2013 Overview

Energy Planning Board Meeting  
November 23, 2010

# State Energy Plan Goals

- **Energy Law Section 6-102(5)**
- **The Board shall...be guided by the goals of:**
  - Improving the reliability of the State's energy systems
  - Insulating consumers from volatility in market prices
  - Reducing the overall cost of energy in the State
  - Minimizing public health and environmental impacts, in particular, environmental impacts related to climate change
  - Additional charge: Maximize cost-effective energy efficiency to meet projected demand growth

# Staff Working Group

- **Energy Law Section 6-102(3)**
- Staff services as directed by the Board:
  - DPS
  - DEC
  - DOT
  - ESD
  - SOEM
  - NYSERDA
  - Assistance, as requested by the Board, from other agencies, departments and public authorities of the state

# State Energy Plan Components

- **Energy Law 6-104(2)**
- **State Energy Plan Shall Include**
  - Energy demand and supply forecasts
  - Infrastructure assessments
  - System additions or alternatives needed to meet energy needs
  - Alternative (emerging) technologies
  - Emerging trends in supply, price, demand and review of current programs
  - Security issues analysis
  - Environmental Justice analysis
  - Urban planning alternatives to reduce energy/trans. demand
  - Greenhouse gas emissions inventory and low carbon strategies

# State Energy Plan Components

- **State Energy Plan Shall Include**
  - Economic Development; Health, Safety, Welfare; Environmental Quality; Energy Costs for Consumers, low-income consumers
  - Recommendations for legislative and regulatory action needed for implementation
  - Additional analyses as the Board deems appropriate
- **Additional Resources**
  - NYPA, LIPA: Strategic Plans, Capital Plans
  - NYISO: Comprehensive Reliability Plans

# Scoping Document

- **Purpose:**

- Identify topics for Analysis, Development and Discussion to fulfill Statutory Requirements
- Further Define and Refine Issues
- Identify Possible Existing Resources for Reference
- Solicit Public Input to ensure all areas of issue are developed in the SEP
- Organize the various Technical Assessments and Issue Briefs for focused discussion of required analyses

# Schedule

- Convene Staff Working Group                      December 2010
- Prepare Working Draft Scope                      January 2011
- Stakeholder Outreach  
and Public Comment                      Jan-Mar 2011
- Scoping Document and Final  
Regulations to Board                      Spring 2011
  
- Draft State Energy Plan &  
Draft Reliability Study                      September 1, 2012
- Public Comment Period &  
Public Hearings                      Fall- Winter, 2012
- Final State Energy Plan                      March 15, 2013
- Biennial Report                      2015
