Comment: I urge the board to develop an energy plan that incorporates the use of solar photovoltaics and solar thermal equipment. A plan calling for 2,000 MW of solar by 2020 is a plan worthy of our great state. A well-designed 2,000 MW solar program can be implemented for as little as \$0.82 in residential rate payer impacts a month and deliver more than \$10 billion dollars in economic output. I strongly support this investment and urge you to incorporate a comprehensive solar program, of at least 2,000 MW by 2020, as part of your State Energy Plan.
