

Name: William Cusworth

Title: NYS citizen

Organization: individual

County: Otsego

Comment: It seems that with the abundance of natural gas in the State that there would be more zeal directed toward drilling it. As I understand it that there is plenty of it for many years to come. It is cheaper, cleaner and right under our feet. Close to the east coast markets. I can't believe that there is consideration given to natural gas from Alaska to supply those east coast markets. Natural gas should be the number ONE item on anyone's list that is considering an energy plan.
