

Name: James Ewanco

Title: none

Organization: taxpayer of NY

County: Broome

Fracing for Natural Gas: PLEASE do NOT let politicians dictate ANY part of the gas drilling rules and environmental regulations ! This state should completely examing the Pennsylvania experience BEFORE allowing fracing AND we MUST insure that our watersupplies and aquafers are safe. Indeed, the location and geology beneath a surface location may disqualify a drilling site and the lack of water and disposal and treatment shoul also disqualify a site. Realize that counties such as Broome are so desperate for more revenue that any lie will be on the agenda. The current NY legislators are an example of how little our "lawbreakers: should be trusted.
