

Name: George W. Frame

Title: Ph.D.

Organization: self

County: Out of State

Comment: I am a resident of New Jersey, but the coastal waters and energy corridors are shared by our two states. Offshore development for LNG is a very bad idea. Offshore artificial islands will cause substantial destruction of marine habitats and wildlife, seriously impact fisheries and recreational opportunities, and increase our dependence on foreign energy sources. Please do not allow offshore development of LNG facilities. Thank you for this opportunity to comment.
