

Name: Robert Goldberg

Title:

Organization: N/A

County: Nassau

Comment: I oppose the basing of a large LNG facility off-shore of Long Island. While I am concerned about safety issues, my primary objection is to providing additional energy rather than concentrating on conservation and efficiency of energy. After all efforts and expense have been directed to optimizing solar heating and conversion to electricity; insulation and efficient appliances; and cluster housing, then new energy sources should be considered. Thanks for considering this.
