Comment: To The State Energy Board, As a New Yorker who has already opted to use wind power via Con Edison's green partners, I would like to urge you create an energy plan that incorporates the use of solar photovoltaics and solar thermal equipment. I think many of my fellow residents would love to use renewable energy, but it's not easy to switch and the options aren't clear -- I only managed to get the wind power because I attended a green conference a few months ago, where they were offering free admission for switching. Please help our great state become an energy leader! A well-designed 2,000 MW solar program can be implemented for as little as \$0.82 in residential rate payer impacts a month and deliver more than \$10 billion dollars in economic output. As a New Yorker I strongly support this investment and urge you to incorporate a comprehensive solar program, of at least 2,000 MW by 2020, as part of your State Energy Plan. Thank you for your time.
