

Name: Amy Peters

Title: None

Organization: None

County: Nassau

Comment: The New York State Energy Plan must be a clearly defined plan and must have an implementation schedule to meet increased energy efficiency, renewable energy development, and greenhouse gas emission reduction goals. The plan must not support new dirty coal plants (or new "clean coal" plants, as there is NO such thing as clean coal- see the NY Times article from Oct. 12, 2009: [http://www.nytimes.com/2009/10/13/us/13water.html?\\_r=2&hp](http://www.nytimes.com/2009/10/13/us/13water.html?_r=2&hp) ), nor should it support expensive and dangerous nuclear power. Drilling in Marcellus Shale for natural gas must require more rigorous environmental review, public involvement, and full disclosure of the risk to our environment and public health. Thank you for your time and consideration.
