

Name: Cameron Peterson

Title: Legislative Aide

Organization: NYS Assembly

County: NewYork

Comment: As a New York State resident, I would like to urge you to incorporate the use of solar photovoltaics and solar thermal equipment in the upcoming state energy plan. Large leaps are likely needed to fix our environment, economy, and broken power production system. Many advocates are calling for 2,000 MW of solar by 2020. This is a worthy plan for a smart push forward. Advocates assert that a well-designed 2,000 MW solar program can be implemented for as little as \$0.82 in residential rate payer impacts a month and deliver more than \$10 billion dollars in economic output. As a New Yorker, I strongly support the consideration of this investment and encourage you to incorporate a comprehensive solar program. I have enjoyed shifting my electricity usage and costs to wind power in NYS, and hope for the ability to add solar to this in the very near future. Thank you.
