

Name: Gilbert Rulon

Title: Resident/Tax payer

Organization: L.I.B.B.A.,Audubon,Sierra Club,W.W.F.,

County: Suffolk

I would hope that your support will be for CLEAN renewable energy for N.Y.10 year energy plan. Contrary to popular belief fossil fuels are not clean or renewable. Living on an island I think that we should be looking toward energy derived from the tides,wind, and solar. Clean free and renewable, tide changes twice a day, the finite life of the sun is much longer than our fossil fuel supply. And if my opinion matters at all I have no problem with a wind farm off shore,makes much more sense to me than a liquid gas island. Yes I realize that the tax revenue generated by the selling of fossil fuels is beyond the scope of many. The repercussion's of what would happen to al! l the people associated with the fossil fuel industry is enormous but,this is somthing that would not happen overnight. Thanking you in advance for putting politics aside and being a foward thinker on this matter, my grandchildrens children will thank you (I am 46 and presently my kids are 13 and 11). In closing I will remind you that I FISH, I HUNT, AND I VOTE. There are many like myself on the so called other side I belive we are called the public, the office you hold is a public office ment to serve the public, please put politics aside on this one and do the right thing. Thank you.
