Comment: To The State Energy Board, I want to see New York leap into the vanguard and make mature choices that benefit the future of our state and our planet. It is the responsibility of our representatives to devise an energy plan that incorporates solar photovoltaics and solar thermal equipment. We need a plan that produces no less than 2,000 MW of solar by 2020. A well-designed 2,000 MW solar program can be implemented for as little as \$0.82 in residential rate payer impacts a month and deliver more than \$10 billion dollars in economic output. As a New Yorker I strongly support this investment and urge you to incorporate a comprehensive solar program, of at least 2,000 MW by 2020, as part of your State Energy Plan. Please be leaders in adapting and innovating our energy systems. Thank you.
