

Name: Vicki Baker

Title: Chair

Organization: JamPac(Jamesville Positive Action Committee)

County: Onondaga

Comment: Please make every effort to keep the public involved in the planning process. We live downwind from a garbage incinerator, quarry and asphalt plants. Our Town (DeWitt) has made every effort to be Climate Smart and Sustainable. Why do we continue to burn our resources when we could create local jobs from recyclable materials and clean renewable energy from Wind and Solar? We do not believe that WTE should receive any distinction as clean or renewable energy as it continues to expose us to any amount of Mercury, lead or Dioxin! We do not support Nuclear power or Hydrofracking using chemicals to pollute our groundwater.
