

ANNE HARRIS, CHAIRMAN TOWN OF LYME PLANNING BOARD

Vermont has a good plan, focusing on helping homes and businesses conserve energy, which in its turn is creating jobs. Do your research on some alternative forms of energy that may be only a feel good solution, doing nothing to actually help our energy needs, and enriching a few at the expense of taxpayers. Taxpayers and energy customers would be better off keeping more of their money to help pay energy costs. Rebates and assistance to lower income families to purchase Energy Star appliances, cars that get better mileage, energy efficient light bulbs, storm windows and insulation would do more to help the majority of New Yorkers. Thank you.
