

HAROLD HAMBROSE, CAPE VINCENT

PLEASE SLOW WIND FARM DEVELOPMENT IN OUR STATE until appropriate policy can guide inexperienced and outclassed local governments being manipulated by giant energy companies. Unsophisticated local governments are acting irrationally and in many cases illegally. Energy giants are now riddling our countryside with turbines that are unproven in the effectiveness and not at all promising in their ability to genuinely deliver a solution to our energy challenges. Each one represents a considerable carbon footprint and a long-term impact on our environment. NEW YORK'S COUNTRYSIDE IS AS VALUABLE A STATE LANDMARK AND LEGACY AS TIME SQUARE. PLEASE CONSIDER US!
