County: Schenectady

Additional Materials: SUBCHAPTER C PLANS OF MAJOR ENERGY SUPPLIERS
Part 7858 Natural Gas Plans

Comments: The energy plan is missing one very important issue. How to get New York, business and individuals, to increase the use on CNG for all vehicles? This one program would save more transportation oil than all the other plans combined. One action that would take this a long way is to add to all the fueling stops on the New York Thruway at least one fuel pump for CNG. The state should fund this by incentives to the operators of the thruway fueling stops. Besides saving oil and savings NY drivers half the cost of regular gasoline/diesel fuel it would reduce the emission of CO2 from all vehicles.
