Comment:

I'm all for an Energy Plan but it should exclude the proposed LNG plants in the New York, New Jersey and Long Beach areas for many reasons, but the most important one to me is the safety of this proposed man-made island that has never been done before. Besides in the US we have abundant amounts of Natural Gas, so why have an overseas (foreign) company import a fuel we already have plenty of? Since living in Rockaway Beach, Queens I have noticed that there are strong winds which would be ideal for the "Windmill" Electrical Generators. I think most, if not all, residents of Rockaway and Long Beach would be in much more favor of these "Green Energy" producers than the dangerous LNG plant. This LNG plant is so strongly opposed by the local residents that it has been nicknamed "Insanity Island." Please say no to LNG! Thank you for taking time to read this and I hope you see how important it is that you stop the construction of any LNG plant on the East Coast shores. Sincerely, Carole A. Shaw A concerned citizen, ocean lover and local resident of Rockaway Beach.
